

TEST REPORT FOR BIOLOGICAL MONITORING FOR ISOCYANATE

Company Name		Jms Specialist Joinery	
Employee Name	Date of Birth	Ref	Result
Ted Winterburn	31/12/1960	20/12794	No Trace (0)

Date sample received at Laboratory
24/07/2020
Date of report
12/08/2020

Based on the sample received on the above date the employee showed no evidence of exposure to Isocyanates

Isocyanate biological monitoring is recommended every 12 months.

This report should be filed in the employee's personal file.

Notes

Biological monitoring measures how much of a chemical has actually entered a person's body, rather than how much is in the environment around them.

Biological monitoring does not give any information about health effects; instead it is a measure of the overall effectiveness of exposure to control measures.

The Control of Substances Hazardous to Health (COSHH) regulations 2002 requires employers to prevent or adequately control exposure.

Yours Sincerely

Paige Haslam
