Hi Simon,

Please see attached our full quotation based upon the Kite Glass design print, if you can let us know what design the architect chooses once they have the latest Kite glass samples.

Hopefully this can be the base offer you have requested.

Regards

Simon

Mr. Simon Thorpe,

Raphael Contracting Ltd
67 Westow Street
London
SE19 3RW

January
Date: 4th December 2024

Dear Sirs,

Project Ref: Glazed Partitions & associated Door-set @ The National Gallery.

We acknowledge with thanks receipt of your enquiry in respect of the above project and herewith provide our proposed specification and quantities based on our interpretation of your requirements.

We have prepared this estimate given the information supplied by yourselves and listed below; however, some assumptions may have been made if the original information was incomplete.

Any assumptions made have been qualified throughout the document.

Our price has been based on the following documents: -

~~Drawing Ref's: NG200-PUR-Ss_25_10_35_35-SWI-DG-A-42031/P27~~

~~Specification Ref's: K30:130A~~

~~BOQ Ref: n/a~~

REFER TO ORDER CLAUSE 4)

If you have any queries please do not hesitate to contact us, and of course we will be happy to attend any negotiation or clarification meeting to suit.

Yours sincerely

Jason Ely
Estimator
jason.ely@planetsouth.co.uk

Simon Holland

simon.holland@planetsouth.co.uk

DESIGN CRITERIA:

- ◆ Glass Specification Design Loads for BS6180 compliance: 3.0kN/m Line Load & 3.0kN/m² UDL
NB: These are assumed loads and would need to be verified by the Client/Design Team/Building Control
- ◆ Fire Performance: NFR
- ◆ Acoustic Performance: Screens; 54dB Rw, door-set; 35dB Rw
- ◆ We have allowed for +/-25mm deflection head detail to our partitions.
- ◆ Heat Soak Tested Glass - please see Appendix A
- ◆ We have assumed the screens and door-sets are fixed to a solid concrete floor and we have therefore made no allowance for any underfloor support transoms of our own. Should this not be the case, please advise and we can advise our additional cost for the support work.
- ◆ We have allowed for glass panel widths to be approximately 900-1000mm wide unless specifically stated herein.

SYSTEM SPECIFICATION

1) PURE100XL; FRAMELESS DOUBLE-GLAZED (54dB Rw)

Non-fire rated, 'frameless' glazing system, consisting of 100 x 27mm aluminium frame sections and a +/- 25mm deflection head, polyester powder coated to a standard RAL colour. Glazed with 1 x 21.5mm low-iron, heat-soaked toughened laminate (Kite Glass screen print) + 1 x 10.8mm Acoustic low-iron laminate safety glass and our Linea dry jointing strips to vertical glass-to-glass abutments and junctions.

2) ISOPRO35; FULLY FRAMED GLAZED ACOUSTIC DOOR-SETS (35dB Rw)

Non-fire rated, fully framed single-action, double-glazed double door-set, consisting of a polyester powder coated aluminium doorframe, 54mm PPC aluminium framed double-glazed door leaves (to achieve a 35dB Rw acoustic attenuation), set on SSS covered recessed floor-springs with polyester powder coated offset top and bottom pivots, 700 x 25mm Ø satin stainless-steel cranked guardsman type pull handles and a floor mounted door-stop ironmongery.

MANIFESTATION

We have not included manifestation

FRAMEWORK COLOUR RANGE

A range of plain RAL stock colours are offered as standard for the partition system framework. Alternative colours including metallic, satin anodized, etc. are available but could be subject to a surcharge addition.

PARTITION TESTING

Acoustic Performance Tests have been carried out to our partition systems to BS 2750 Part 3.

Fire performance tests are in accordance with BS.476 Part 22 (1987) in respect of

- Double glazed partitions
- Door and frame constructions

Impact Tests- Partition system tests have been carried out in accordance with BS. 5234 Part 2/B,C,E & G

SOUND PERFORMANCE

- The systems specified have been developed after careful research and development. Acoustic attenuation figures quoted are based upon laboratory test figures. The actual performances achieved on site may vary dependent upon the environmental conditions into which they are installed due to flanking sound transmission and services incorporated into our systems.
- Particular attention should be paid to construction including glazing, single or double, where acoustic performance will only achieve that level attained by the glass. Tegular ceiling joints, door-sets, lighting troughs, perimeter trunkings and box window mullions are also areas which will affect overall performance levels.

BUILDING CONTROL

We have assumed that all applications relating to Building Control and Fire Officer requirements would be the responsibility of others. Our proposals may, therefore, be subject to any resultant report or imposed requirements.

PRICING SCHEDULE

| BoQ Ref: | Item No: | Description: | Quantity | Unit | Rate | Value |
|----------|----------|---|----------|------|------------|-------------------|
| | | To design, supply and install to your fully prepared and structurally suitable preformed openings: PLANET internal glazed partitions fitted between top of FFL to underside of FCL | | | | |
| | | First Floor: | | | | |
| | 1 | P100XL; NFR, 54dB Rw, 3kN line load, +/-25mm deflection, double glazed screen; 6820 x 2770mm height | 1.00 | it. | £25,965.26 | £25,965.26 |
| | 1A | P100XL; NFR, 54dB Rw, 3kN line load, +/-25mm deflection, double-glazed screen; 2020 o/a x 2770mm height, including a leaf & a half IsoPro35 door-set | 1.00 | it. | £16,011.58 | £16,011.58 |
| | 2 | Automatic swing door operator (Dorma ED250 FA) to main leaf including IR sensor activation (connections by others). Please note, doorframe head and operator unit must be situated below the ceiling. | 1.00 | it. | £8,245.32 | £8,245.32 |
| | | Quotation Total Value: (excluding VAT) | | | | £50,222.16 |
| | | Extra-over Options: | | | | |
| | • | Dust Protection: (single application) | 1.00 | ITEM | £431.46 | £431.46 |

- **TERMS OF PAYMENT:** Nett 28 days. Subject to satisfactory trade references and credit checks.
- **Prices exclude VAT.**

PROGRAMME & LEAD-TIMES

~~To a mutually agreeable timetable, our approximate lead-times are as follows;~~

Drawings/Design work; 2-3 weeks (not including drawing approval / or amendments).
Non-Fire Rated Standard products manufacture; 2-3 weeks (from approved drawings).
Fire Rated products manufacture; 6-8 weeks (from approved drawings).
IsoPro & ETec door manufacture; 4-5 weeks (from 1st Fix framework installation).

~~Please contact us directly for more specific design, manufacture and installation times for your project.~~

REFER TO ORDER CLAUSE 5)

APPENDIX A

HEAT-SOAKED GLASS: INCLUDED

Although not currently priced herein, Planet Contracting would recommend that some elements of glazing (particularly atria) would benefit from being of a 'heat soaked' specification to reduce the potential impact of Nickel Sulphide Inclusions (NiS). All toughened glass contains some level of impurity and one such impurity is Nickel Sulphide Inclusions (NiS). Most NiS inclusions are stable and cause no problems, however there is a potential risk that NiS inclusions could cause spontaneous breakage. By heat soaking toughened glass this risk is dramatically reduced although not completely eradicated

Planet Contracting would therefore recommend that heat-soaked glass is used for 'vulnerable' areas (and areas where if the panel were to fail at some point in the future it would be difficult to access for replacement) such as atria, high level glazing and balustrades. Although the heat soak test greatly reduces the risk of spontaneous breakage, it does not eliminate the risk entirely. Where heat soak testing has been requested / allowed for, toughened glass supplied by Planet Contracting is heat soak tested in accordance with BS EN 14179. Spontaneous fracture of toughened glass through NiS or any other inclusion whether heat soak tested or not is not covered under any warranty.

Please contact Planet for more information on NiS, heat soaking and associated cost advice if you feel this would be beneficial.

Planet's full Company Policy on Heat Soaking and NiS Spontaneous fracture is available on request.

ESTIMATE QUALIFICATIONS:

GENERAL NOTES

- 1) **Protection:** we have provided an extra-over value for standard protection of the glazed installation using full coverage Correx sheet both sides. This would be carried out in one continuous visit and upon completion the works would be handed over to the main contractor. Any other works thereafter would need to be by others, including any repair or maintenance of the protection, removal and disposal of protection, and, final clean if required.
- 2) **Fire & Acoustic Barriers:**
We have made no allowance for the supply or installation of any Fire / Acoustic Barriers within the suspended ceiling voids or raised floor voids.
- 3) **Works to Adjacent Structures:**
We have made no allowance for any works to or above suspended ceiling or bulkheads / or below raised floor. Our head / floor / abutment tracks fix directly to ceiling grid / raised floor tiles / adjacent Drywall / blockwork and gain suitable stability from this construction. It is advisable however that timber grounds are built into adjacent Drywall / MF ceilings / bulkheads so as to gain a suitable fixing into these constructions.
- 4) We have allowed for PLANET's standard ironmongery.
- 5) Please be aware that our door systems would not be compliant with Secure by Design certification (PAS24).
- 6) Please note that we do not include finger guards as standard. Should anti-finger traps be required please advise us so that we can make an allowance accordingly.
- 7) We have excluded protection of our installed works.
- ~~8) We have excluded cleaning of our installed works.~~
- ~~9) We have made no allowance for any Access Control to our door-sets.~~
- 10) Please be aware that this installation will give rise to noise and dust. If the work is to be carried out in an occupied building, arrangements may need to be made by the contractor/client to protect the occupants. Should out of hours working be required, please notify us so that we can advise the additional costs.
- 11) Individual prices given are based upon the project proceeding in its entirety, should any element not be required; please advise us so that we can revise the price accordingly as some fixed overhead costs could alter the individual prices.
- 12) Structural openings into which we are to install our products must be true, level, square and accurate in size. **The structure provided for us to fit to must be adequate to support and accommodate any imposed loadings of the installation and to guarantee fixings. Planet Contracting undertake engineering calculations only for their own structures** and have made no allowance, and accept no responsibility, for engineer's calculations to any surrounding structure to which we are to fix, including any loads imposed on or transferred to the structure. It is the responsibility of the contractor/client to request such material information from Planet Contracting where needed for additional calculation purposes.
Planet Contracting accept no responsibility for checking the suitability, or accuracy of work carried out by others.
- 13) Opening/Closing forces for doors with self-closing mechanisms may not be compliant with Approved Document Part M (equality act) opening/closing forces. Therefore, the Design team/Client may need to consider additional options surrounding the operation of self-closing doors. Opening/Closing forces can be influenced by internal air pressures, air conditioning, heating etc. and can result in different opening/closing forces throughout the building. We cannot guarantee or predict the opening or closing forces that the doors will have when they are in their installed position.
- 14) Where relevant, the contractor/client is responsible for the cutting in and adaption of all floor finishes. Where floor spring boxes / lock keeps and any associated items are required these will be supplied free-issue for builders works to be undertaken by others.
 - Where floor-springs are to be set in a raised floor, we require the (free-issue) supply of 1No. raised floor pedestal per floor-spring for support. We have made no allowance for altering the raised floor other than to form hole in tile to fit floor spring (where floor spring position is on tile junction, any alterations to the floor involving moving pedestals, etc. are to be carried out by others).
 - Where floor-springs are to be set into a solid floor we require the floor-spring hole to be prepared by others (Planet will provide setting out / positioning instructions), we will install the floor-spring and set in position (making good to floor finishes (where required) to be by others).

- 15) No allowance has been made for the provision of samples, mock-ups or prototypes; or, for any laboratory or site testing of the installation.
- 16) All film manifestation to be applied to the outside face of the glass and to the floor side of Atrium glazing, i.e. not within the glazing cavity (to double-glazed systems) or void side of Atrium glazing, unless stated otherwise.
- 17) We have allowed for approval between Planet Contracting and the design team only. We have made no allowance for any costs associated with obtaining approval from local authorities etc.
- 18) ~~Price subject to final design detail and all costs should be regarded as budget until a full site survey has been undertaken.~~
- 19) Our price does not include for any site attendance (post installation of our works) for maintenance during the warranty period or until practical completion of the project. If you require a maintenance plan for this period, please advise us so that we can incorporate your requirements and revise our estimate accordingly.
- 20) The above prices assume that the site access is suitable for this product - both for the delivery of material and for the subsequent distribution of material to the working area.
- 21) We have made no allowance for any Mastic / Caulking / Filling within our price and assume these works will be carried out by the decorating sub-contractor.
- 22) The installation of our works (including any applied film manifestation if applicable) cannot commence in wet/dusty environments. The employing contractor must ensure site conditions are suitable to enable the installation of glass.

ATTENDANCES:

- ◆ Attendances are as detailed on the enclosed Appendix B "Details of Responsibilities". We reserve the right to review our estimate if these attendances are amended/alterd.
- ◆ We have included for access to works up to 3 metres. Thereafter all access & fall protection scaffolding; adaptations; cradles; towers & working platforms suitable for the proper execution of our works are to be supplied, erected and dismantled by others **unless noted separately**.
Where glazing works are situated in an atrium location, and the glazing operation cannot be entirely carried out from the floor slab side, we would require a scaffold for our works. In this instance the scaffold should be able to accommodate vacuum lifting equipment. We would require a continuous ladder beam at the head of the scaffold, to enable the use of an electric winch to facilitate our works. A clear zone of 500mm from the outer face of the furthest protrusion would also be required. The scaffold should be able to accommodate all lifting operations and imposed loads.
- ◆ **All works to be carried out during normal working hours. We have made no allowance for any out of hours working / deliveries.**
- ◆ If applicable, Edge Protection would need to be provided by others; additionally, we have not allowed to remove any in situ edge protection prior to carrying out our works.
- ◆ Time lost by downtime or unavailability of tower cranes, hoists or goods lifts should be recorded and the equivalent period added to our sub-contract programme.
- ◆ Temporary Works: no allowance has been made for any temporary works.

AUTOMATICS NOTES

- 23) All electrical wiring, connections and conduit are to be by others.
- 24) Please ensure that a fused spur power supply is provided to the head of the doors. This must be 240V 13A and should be protected with a 30mA residual current circuit breaker.
- 25) At time of commissioning the doors, we will need a minimum of 4 hours of exclusive and unimpeded access in order to carry out this work successfully.
- 26) If the door system cannot be demonstrated at the time of commissioning, then Planet Contracting would be prepared to carry out this duty at a later date against an additional charge. Until this instruction has taken place, we advise that the system should be immobilised to avoid it being operated and causing potential damage to the mechanical and electrical components.

DELIVERY

This price is based on two deliveries (framework and then glass/doors) using a 7.5ton curtain-sided vehicle. Should additional deliveries, 'Moffat' offload or smaller vehicles be required, these will incur additional charges.

FIXED PRICE

~~This price is fixed for 1 month from date of quotation and due to volatility in raw material and supplier pricing (particularly aluminium and glass), we would therefore strongly recommend, where possible, that if the order can be placed within the fixed period, then it would be advisable to do so.~~

MANUAL HANDLING POLICY:

- ◆ It is assumed that there will be a suitable goods lift / hoist available to transport all materials to the upper floors.
- ◆ We have assumed that a suitable safe access route will be provided for all horizontal distribution of materials. This would need to span from point of material offloading to the site hoist / goods lift and extend to the working area(s).
- ◆ PLANET's manual handling policy stipulates that where glass panels/doors exceed 80kg's the use of mechanical handling equipment would be used to facilitate all distribution and installation. Further discussions would be required regarding material distribution where site conditions restrict or prohibit the use of mechanical handling equipment, which could result in the reduction of panel sizes.

COMMERCIAL & CONTRACTUAL

This estimate is provided by **Planet Contracting Ltd** Trading as **Planet Architectural Glass / Planet Partitioning**.

- 1 Our price will be held firm within the terms as defined within the JCT Standard Form of Building Contract (2011) for 3 months from the date of this estimate.
- 2 *You will no doubt be aware of the impact that the Grenfell Tower tragedy has had on the availability of professional indemnity cover being tendered by insurance companies since the Summer of 2018 and the significant affect this is now having on insurance premiums. In light of what continues to be a diminishing market, we intend to work with our clients in order to manage our future liability exposure and to ensure that expectations in terms of cover are proportionate to the contract size. For contracts up to £100,000, we propose an upper limit of £1m, for contracts between £100,000 and £500,000, an upper limit of £2m and for contracts above £500,000 a maximum limit of £5m. Please also note that, although we have a Performance Bond facility in place, we would prefer to provide a Parent Company Guarantee, where additional assurance is required.*
- 3 Planet Contracting Limited where possible avoid Retentions on projects under £20,000. However, we confirm that we will guarantee to attend to any defects resulting from our installation, however unlikely this may be, completely free of charge and in a timely manner within the 12 months' defects liability period. For projects over £20,000 Retention is based on 3% with 50% released at practical completion of our works and the balance released after expiry of our 12-month defects liability period.
- 4 Should liquidated and ascertained damages be specified, then Planet Contracting Ltd total liability will be limited in all cases to 5% of the value of our order/sub-contract value.
- 5 Day-Works:
Should any variation to the sub-contract works need to be valued on a day-work basis the percentage additions to each section shall be as follows;

| | | | |
|------------|---|------------|---|
| Materials | - | 25% | (after Practical Completion: 30%) |
| Plant | - | 15% | (after Practical Completion: 20%) |
| And Labour | - | £43.00/hr. | (after Practical Completion £75.25/hr.) |
- 6 Please be aware that we have included for normal working hours at this stage. Should out of hours working be required, please notify us so that we can advise the additional costs.
- 7 Our estimate assumes uninterrupted access, continuity of work and full working days. If additional visits are required because of site delays, etc., they will result in additional charges.
- 8 Please note that the prices assume that the whole job will proceed. Any variation in the amount of work required will not necessarily vary the price pro-rata due to the allocation of fixed costs.
- 9 At this stage, we have excluded any costs associated with a Performance Bond. Please note however that when Performance Bonds are included, they would be based on standard ABI wording. At no stage would PLANET accept an 'On Demand Bond'.
- 10 We would not be able to accept any clauses within the contract documentation that makes reference to "fit for purpose".
- ~~11 Planet Contracting Ltd reserve the right to withdraw this estimate without explanation.~~
- 12 In the event of an order being placed and subsequently cancelled prior to any work being undertaken, Planet Contracting reserve the right to charge a minimum of 10% of the total estimated value of the works to cover administration costs incurred.
- 13 Adjustments to Quantity:
Please note that should a contract resulting from this quotation be subject to a re-measurement clause, the pricing level would remain applicable only providing the quantities are not subjected to a decrease in excess of 10% of those quoted herein.

Subject: RE: S8697 - Raphael Contracting Ltd - National Gallery

Hi Paul,

Thank you for the quick response, I have passed this information onto our design department.

My apologies, please see our lead times and manual handling policy below for your information.

Programme & Lead-Times

Our approximate lead-times after drawing approval are as follows;

- First set of drawings/design work provided; 1-2 weeks (not including amendments).
- Drawing amendments; 7-10 working days.
- Non-Fire rated standard trackwork installation; 2-3 weeks (from fully approved drawings).
- IsoPro door/Eclipse sliding door installation; 4-6 weeks (from trackwork installation).

Manual Handling Policy

- ~~It is assumed that there will be a suitable goods lift / hoist or other forms of mechanical lifting equipment provided for vertical distribution of panel materials in excess of 80kg's.~~
- We are unable to manually carry materials up staircases in excess of 80kg's (panel weights on drawings).
- ~~Please contact us if mechanical lifting is not available as described above.~~

Should you wish to discuss, please do not hesitate to contact us.

Kind regards,

Jade Goodwin

Morning Simon

Just so you have the latest information please find attached Addendum Order 04 with construction information, the official order will be sorted by H/O next week.

It is our understanding you have been in discussions with Purcell the project Architect regarding this package and one issue raised was the glass is to match the balustrade opposite (which I believe SRM have a sample on site) so once we get a meeting sorted hopefully no issue getting drawings etc underway.

Importance: High

Good Morning

We invite you to quote to **supply and fix** the Internal Glazed Partitions on the above contract all in accordance with the attached documentation :-

Please note the following:-

- 1) **Notwithstanding the attached please base your quotation upon a frameless system with 3kn loading in the glass (acid etched)**
- 2) Attendances are to be as the attached schedule.
- 3) Any timber based products are to be either FSC 70% mix or FSC 100%.
- 4) You are to fully comply with the latest employment and health and safety regulations with all your operatives holding a current CSCS card.
- 5) The installation date will be approx. 2nd Quarter 2024, please fix your quotation in accordance with this time frame
- 6) Please include your own ironmongery within your price.
- 7) Please return your quotation to our Chessington office by not later than COB Tuesday 1st August 2023 **(we are informed by the main contractor for the project, SRM, that you have already prepared a quote for this project).**

Regards

Jason Wray
