Timber Prices About To Rise Significantly

July 2009

The market for Softwood timbers has changed considerably over the last few months and as a result the predicted price rises have now begun to be felt in the UK. Many factors have contributed to this situation but mainly its due to cut backs in timber production from the Finnish & Swedish mills due to the current economic situation.

As a result shortages are beginning to appear in the market and this in turn is driving up the price. The Decline in the value of the pound in the international currency market has also had a negative impact on the ability of the UK to buy Timber at competitive rates.

Many predict this situation will get worse in the coming months with prices expected to rise between 25 – 30%.

We therefore regret that we will be forced to increase all Softwood carcassing & Joinery prices from the 1st July 2009 by approx 10 – 15% and foresee further increases within the coming months.

Although very difficult in the current market we advise that you are cautious when pricing for forward works as this situation looks likely only to get worse.

Assuring you of our best attention at all times.

For the attention of Martin O'Brien

Re - Material Schedule for 2009

Further to our recent conversation regarding updating our materials schedule for 2009 we have pleasure in offering the following for your consideration.

As requested we have included several new product lines and hope you find these to be acceptable.

We have also revised our policy regarding the charging of the congestion charge and in future the costs will be absorbed in all our material costs.

We also confirm our agreement to continue the 2.5% discount as an annual rebate based on your turnover. This will be paid by way of a credit note once the December account has been paid and any credits have been taken off.

Prices are offered subject to availability and manufacture increases at the time of ordering & are exclusive of vat.

We trust you find this proposal to be acceptable and look forward to our continued and mutually beneficial relationship.

Regards Paul Seymour
